BUSINESS SPOTLIGHT

Swat Mosquito Systems

Swat Mosquito Systems is operated by the dedicated management team of co-founders Damon Cook and Wylie Davis, and President Steve Jenkins.

Steve Jenkins was instrumental in establishing the first broad scale mosquito misting system in the Texas market, and now brings his expertise to residents and businesses in South Florida.

The company has introduced a revolutionary new mosquito misting system that uses a safe, all-natural pest killer derived from chrysanthemums or an equally safe organic alternative made from rosemary oil. These environmentally-friendly pest killers are biodegradable and leave no residue. The new pest killers, combined with SWAT's unobtrusive system installation, let customers in Florida, Alabama and other mosquito-plagued states use their yards, day or night. Mosquito misting systems have been around and effective for decades, but SWAT revolutionizes this method by introducing safe, natural sprays custom-designed for individual properties.

SWAT Mosquito Systems' digital control panel sets it apart from the competition. Setting or changing the frequency and duration of mist cycles on the easy-to-read display panel couldn't be easier. When misting isn't required, a weather sensor can automatically delay it. Additionally, it is the only system that has a digital level sensor which displays how much insecticide remains in the reservoir. And, if you want to take command, simply use the three-button remote control to mist in-between cycles or turn the system off.

Located at 11149 Interchange Circle South in Miramar, they can be reached at 866-900-SWAT.

Kills Mosquitoes and No-See-Ums. Guaranteed.

MEET THE NEXT ENDANGERED SPECIES.™
